

ESSENTIAL POWER BATTERY LINEUP

Stryten Energy delivers energy solutions to critical systems in need of uninterrupted power supply. Providing trustworthy brands and performance for telecom, utilities and UPS needs, including a suite of batteries and chargers, racking, service and recycling.

MARATHON FTX

Marathon High Temp FTX valve-regulated lead acid batteries have been optimized for high temperature operation. Engineered for premium performance and maximum battery life, Marathon FTX batteries have a 15 year battery life design. These batteries feature a high-compression design utilizing Absorbent Glass Mat (AGM) technology for greater than 99% recombination efficiency and superior Lead-Tin-Calcium-Silver Positive Alloy to resist corrosion at higher temperatures.

ABSOLYTE GP & GX

Absolyte GP & GX 2-volt battery cells are a proven power solution for telecommunications, UPS, electric utility, railroad, and renewable energy applications. Designed and optimized for standby float, high rate, or deep cycling.

SPRINTER NEXT

The Sprinter Next batteries incorporate advanced VRLA technology designed for ultra high rate performance in critical UPS and power supply applications. The Sprinter Next has multicell design for faster installation in cabinets or on racks; a separate battery room is not necessary.

G77 SERIES BATTERY CHARGER

The G77 Series Battery Charger is engineered for the demanding requirements of Switchgear, Process Control, Oil Exploration and other DC power applications. Powered by Microprocessor Controlled SCR technology, the G77 Series Battery Charger / Battery Eliminator has $\pm 0.25\%$ DC voltage regulation from no load to full load over the specified input voltage, frequency and ambient temperature ranges.

FLOODED CLASSIC

Flooded Classic® MCX 2-volt and 4-volt batteries are industry-proven power solutions for electric utility and other general-purpose discharge applications that combine long-duration discharge with solid 1-minute rate performance.

Flooded Classic H1T 2-volt battery cells are an industry-proven power solution for telecommunications, electric utility, industrial UPS, and other long-duration discharge or general-purpose applications.

Flooded Classic NXT 2-volt battery cells are an industry-proven power solution for telecommunications, electric utility, industrial UPS, and other long-duration discharge/general-purpose applications.

SONNENSCHN

Sonnenschein A600 2-volt cells and 6-volt/12-volt top-terminal bloc batteries are an industry-proven power solution for a variety of telecommunications, UPS, electric utility, and general-purpose applications.

Sonnenschein A400 top-terminal 6-volt and 12-volt bloc batteries are industry-proven power solutions for a variety of telecommunications, electric utility, UPS, and general-purpose applications. Superior design principles across a wide capacity ensure long life and solid discharge performance.
