

STRYTEN ENERGY

M-SERIES

T310 >>>

Stryten Energy Tubular T310 batteries allow up to 90 days between watering intervals for increased uptime and reduced maintenance costs. Stryten Energy's round tube design is more efficient and delivers longer run times than competitive square tube designs. The T310 product line delivers up to 125 Ah per cell and includes a 90 Ah standard electrolyte cell that fits within the 23.3" size.

THE ENERGY TO CHALLENGE

LOW MAINTENANCE TUBULAR

- Low maintenance 90-day watering interval
- Engineered for premium heavy-duty performance
- Enhanced grid design for increased energy efficiency
- Increased positive spine diameter for longer life and greater efficiency
- Improved separator technology for added vibration protection
- Superior gauntlet design ensures plate and active material integrity
- Approved for opportunity and fast charging applications

The Energy to Challenge

Stryten Energy helps solve the world's most pressing energy challenges with a broad range of energy storage solutions and components across the Essential Power, Motive Power, Transportation, Military and Government sectors. Headquartered in Alpharetta, Georgia, we partner with some of the world's most recognized companies to meet the growing demand for reliable and sustainable energy storage capacity. Stryten powers everything from submarines to subcompacts, microgrids, warehouses, distribution centers, cars, trains and trucks. Our stored energy technologies include advanced lead, lithium and vanadium redox flow batteries, intelligent chargers and energy performance management software that keep people on the move and supply chains running.
